FOR IMMEDIATE RELEASE

LASERLYTE EXPANDS ITS PISTOL BAYONET LINE

Due to overwhelming popularity LaserLyte® has expanded its Pistol Bayonet line. The latest offerings, produced in association with KaBar® Knives, feature two new handle colors as well as a stainless version of LaserLyte's original Pistol Bayonet. New handle colors match popular tan and green frame pistols while the stainless blade with black handle complements the look of any black frame gun with a stainless slide.

The razor-sharp, 2.75-inch Ka-Bar blade fits on any medium to large pistol with rail, and slides on and off easily with the press of two buttons. Featuring a full tang design, the carbon steel blade is sharpened to a fine edge, finished with a black Teflon® coating (except for the stainless) and comes with a custom polymer sheath. The handle is constructed from 30 percent glass-filled nylon for extra strength and durability. Additionally, the company will offer the standard black handle with a stainless steel blade. A LaserLyte original, this Pistol Bayonet is ready for any situation – or just looking cool on your favorite gun. MSRP \$39.95.
